

Jan Sachse

AI Project Management

contact

✉ jansachse@outlook.com

☎ +48 780028423

📍 Warsaw, Poland

skills

Multi-agent pipeline design & swarm intelligence
Prompt engineering
Project Management
AI integration in enterprises
Process automation, SOPs & KPIs
Context engineering (SKILL.md, DESIGN.md)
Product Owner Scrum
Stakeholder management
AI consulting
English C1+
UI/UX Design

softwares

Claude Code, OpenClaw, gstack
Python (scikit, PyTorch, Transformers, LangChain)
HuggingFace, MCP servers
Obsidian, Notion
Langfuse, PostHog
Vercel, GitHub, Docker
Miro, Canva, Figma
Jira + Trello
n8n
Zoom, Teams, Loom

achievements

- 2025 BLOXHUB Copenhagen Hackathon — distinction
- 2024 Gdańsk Press Photo award
- 2023 1st place Shark Tank experience at Kozminski University
- 2020 Koźmiński Scholarship
- 2018 Finalist of Entrepreneurial Olympiad of Poland – 0.1% best out of 35 000
- 2017 4th place in the world at Oddysey of the Mind competition

about me

AI and automation consultant specializing in intelligent systems, workflow optimization, and UX-driven design. Skilled in multi-agent architecture, process automation, and data analytics, I create solutions that are both efficient and intuitive. Passionate about bridging technology and business needs to deliver measurable impact.

experience

Asseco Data Systems — AI Specialist (2025 – Present)

- Context engineering — structured .md knowledge systems (DESIGN.md, SKILL.md) for AI agent workflows
- Vibecoding with Claude Code — multi-agent loops, autoresearch patterns, gstack-style orchestration
- AI pipelines with Langflow & Langfuse, PostHog analytics
- AI-powered document automation in Word & Excel via Claude
- SIWZ (public tender) analysis & throughput/capacity analysis
- Designed AI training programs for enterprise audiences

Freelance AI Specialist (2024–2025)

- Built multi-agent architectures & RAG workflows using OpenClaw, MiroFish swarm simulations
- Deployed production apps via Vercel with ElevenLabs API voice integration
- Obsidian second-brain knowledge systems for AI-augmented research
- AI consulting & environment development for private sector clients
- Project management for private companies.

Bplatform (2022–2023) Shass AI (2023–2024) Startup Projects Product owner/Project manager/UX Designer

- Designed architecture of 2 app systems from scratch.
- Collected UX research data, Designed Apps Identity, Prototyped with Figma and oversaw implementation
- Acted as a Product Owner to ensure quality and punctuality
- Managed communication with stakeholders and developers
- Led whole product lifecycle up to ready to use phase.

education

Koźminski University
Bachelor in Artificial Intelligence + Management
2020 – 2024 Graduated

- **Machine Learning** – supervised and unsupervised methods, model training and evaluation.
- **Deep Learning** – architecture of convolutional and recurrent neural networks for image and video processing.
- **Intelligent Agents and Multi-Agent Systems** – decision-making under uncertainty and agent communication protocols.
- **Big Data Analytics** – processing large-scale datasets using distributed computing frameworks.
- **AI Ethics** – frameworks for responsible AI development, addressing bias, fairness, transparency, and accountability in automated decision-making.

Jan Sachse

AI Solution Architect

📍 Warsaw, Poland

skills

Multi-agent systems & swarm intelligence
RAG & GenAI architecture
MCP / agent-system integration
Solution & enterprise architecture
Prompt & context engineering
AI cost & model optimization
Proof of concept to production
AI integration in enterprises
Process automation, SOPs & KPIs
Presales & solution consulting
English C1+

softwares

Claude Code, Cursor, GitHub Copilot
OpenClaw, Codex, MCP servers
Python (PyTorch, Transformers, LangChain)
Qdrant, HuggingFace, Ollama
Langflow, Langfuse, PostHog
Vercel, GitHub, Docker
Next.js, TypeScript, React
Obsidian, Notion
n8n, Figma, Miro, Canva
Jira + Trello
Zoom, Teams, Loom

achievements

- 2025 BLOXHUB Copenhagen Hackathon — distinction
- 2024 Gdańsk Press Photo award
- 2023 1st place Shark Tank experience at Kozminski University
- 2020 Koźmiński Scholarship
- 2018 Finalist of Entrepreneurial Olympiad of Poland – 0.1% best out of 35 000
- 2017 4th place in the world at Odyssey of the Mind competition

about me

AI Solution Architect designing production GenAI systems — RAG pipelines, multi-agent architectures and MCP integrations. I turn ambiguous business problems into proofs of concept and enterprise-ready solutions, balancing models, infrastructure and cost. Strong in consulting, presales and workshops.

experience

Asseco Data Systems — AI Specialist (2025 - Present)

- Designed GenAI & RAG architectures and multi-agent systems (OpenClaw) for enterprise workflows
- Built MCP servers connecting AI agents to business systems — documents, e-mail, knowledge bases
- AI document automation in Word & Excel; SIWZ public-tender & throughput/capacity analysis
- AI-native delivery with Claude Code & Cursor; context engineering (DESIGN.md, SKILL.md)
- Designed and ran AI training programs and technical workshops for enterprise audiences

Freelance AI Solution Architect & Engineer (2024–2025)

- DocChat — production RAG over PDF/DOCX (LangChain, Qdrant, Ollama) shipped as an MCP server
- hackathon-framework — Claude Code plugin: shared MCP brain, parallel autoresearch & agent orchestration
- Shipped 15+ Vercel apps (Next.js 15, TS), incl. multi-tenant e-commerce (Payload CMS, Stripe Connect)
- Built GenAI tools PoC to production: offer/article generators, document converters, AI course maps
- AI consulting, solution architecture & model/infra cost optimization for private-sector clients

Product Owner / Project Manager / UX Designer Bplatform (2022–2023) · Shass AI (2023–2024) · Startup Projects

- Designed architecture of 2 app systems from scratch and led the full product lifecycle
- Ran UX research, prototyped in Figma, and acted as Product Owner managing stakeholders & delivery

education

Koźminski University
Bachelor in Artificial Intelligence + Management
2020 – 2024 Graduated

- **Machine Learning** — supervised and unsupervised methods, model training and evaluation.
- **Deep Learning** — architecture of convolutional and recurrent neural networks for image and video processing.
- **Intelligent Agents and Multi-Agent Systems** — decision-making under uncertainty and agent communication protocols.
