SKILLS

Solution & enterprise architecture

Multi-agent systems & swarm

RAG & GenAI architecture

MCP / agent-system integration

Prompt & context engineering

Proof of concept to production

AI integration in enterprises

Presales & solution consulting

AI cost & model optimization

Process automation, SOPs & KPIs

Product Owner, Scrum

TOOLS

Claude Code, Cursor, Copilot

OpenClaw, Codex, gstack

MCP servers

Python: PyTorch, Transformers

LangChain

Qdrant, Pinecone (vector DBs)

Ollama (local models)

Langflow, Langfuse, PostHog

Vercel, GitHub, Docker

Next.js, TypeScript, React

Hugging Face

n8n, Make, Zapier

ABOUT

I design production GenAI systems: RAG pipelines, multi-agent architectures and MCP integrations. I turn ambiguous business problems into proofs of concept and enterprise-ready solutions, balancing models, infrastructure and cost. Consulting, presales, workshops.

EXPERIENCE

2025 – present

AI SPECIALIST · AI PIPELINES & OPERATIONS AUTOMATION

- Designed GenAI & RAG architectures and multi-agent systems (OpenClaw) for enterprise workflows
- Built MCP servers connecting AI agents to business systems — documents, e-mail, knowledge bases
- Context engineering — structured .md knowledge systems (DESIGN.md, SKILL.md) for agent workflows
- Designed and ran AI training programs and technical workshops for enterprise audiences

2024 – 2025

FREELANCE · AI SOLUTION ARCHITECT & ENGINEER

- DocChat — production RAG over PDF/DOCX (LangChain, Qdrant, Ollama) shipped as an MCP server
- Shipped 15+ Vercel apps (Next.js 15, TS), incl. multi-tenant e-commerce (Payload CMS, Stripe Connect)
- AI consulting, solution architecture and model/infra cost optimization for private-sector clients

2022 – 2024

BPLATFORM · SHASS AI · PRODUCT OWNER / UX

- Designed the architecture of 2 app systems from scratch
- Built an AI recommender backend with semantic search and RAG: tokenization and embeddings in Hugging Face
- Ran UX research, designed app identity, prototyped in Figma and oversaw implementation

EDUCATION

KOZMINSKI UNIVERSITY · MANAGEMENT & AI · 2020-2024

- Introduction to Python & ML, Advanced ML, Deep Learning
- Big Data & Algorithms, Statistics for ML, Data Mining
- Intelligent Agents & Multi-Agent Systems, Cloud, AI Ethics
- Project Management, Scrum, KPI, Strategic Management (AI)

ACHIEVEMENTS

2025 BLOXHUB Copenhagen Hackathon — distinction

2025 PSPO II — Professional Scrum Product Owner II

2023 1st place — Shark Tank, Kozminski University

2018 Finalist — Entrepreneurial Olympiad, top 0.1%
